PLEASE NOTE

- These are example prices given only as a guide.
- Powder coating example pricing does not include the blasting charge – we will quote separately for this.

HOW TO MINIMISE COSTS

- Thoroughly degrease everything so media does not cling to it.
- Plug blind holes with bolts or Bluetac because they tend to trap media.
- Remove long studs which are likely to make the job awkward.
- Mask off gasket faces and any other delicate features with duct tape.
